DETAILED ACTION

1. This action is responsive to communications: Amendment filed on 10/20/2005 and IDS filed on 10/25/2005.
2. Claims 1-10 and 12-27 are pending in this case. Claims 1, 10, 17, and 22 are independent claims. Claims 1, 10, 17, and 22 have been amended.
3. The rejection of claims 1-10 and 12-27 under 35 U.S.C. 103(a) as being unpatentable over Neibauer (The ABCs of WordPerfect 8, published in 1997) in view of Prinzing (US Patent Number 6,480,206, filed on February 24, 1998) has been withdrawn due to amendments.

EXAMINER'S AMENDMENT

4. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Please replace the Abstract with the following:

An extensible editor allows integration of extensions that modify the editor's default behavior and provide customized feedback to users. The editor includes interfaces through which extensions are connected to the editor and through which selection services and highlight rendering services are provided. The selection services interfaces provide a clear separation of a logical selection position in the document and

the visual feedback provided for the selection, allowing extensions to be designed that provide customized selection feedback. The highlight rendering services interfaces provide an extension with the ability to augment an existing selection without modifying the actual document. The editor also includes an event routing model that works to decrease the occurrence of conflicts between the editor and extensions and between extensions.

REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Regarding amended independent claim 1, none of the references, either singularly or in combination, teach or suggest to a person of ordinary skill in the art at the time of the invention the amended features, "...a design registry containing respective entries for the designers, wherein the entries are arranged in sequential order; and an event routing controller adapted to route events related to the highlight rendering services component to at least one of the designers based at least in part on the sequential order of the entries in the designer registry." The examiner notes that while providing an extensible document editor which may contain a highlighting services component is not a novel feature (See Examiner Referenced Patents and Non-patent Literature), but as claimed in claim 1, the method in which communication between the designers and mechanisms is very specific in nature and the event routing methodology is not taught or discussed in the prior art, thus it is considered to be novel and unobvious to a person of ordinary skill in the art. Thus, the limitations of claim 1 are

Art Unit: 2178

considered novel, and unobvious to a person of ordinary skill in the art at the time the invention was made in view of the prior art of record.

In regards to independent claims 10, 17, and 22, the examiner notes that said claims are substantially similar to independent claim 1 in reference to their allowability based on the limitations discussed above as providing allowability to claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:
